F. JOURNAL CLINKER

Oregon Portland Cement Company  
Inter-Office Memorandum

NOV 14 1984

Date November 7, 1984

To Dick Cooke, Ken Rone, Al Howk,  
Jack Staley, Erik Voldbaek, Ron Huffman

From Ed Miller

Copies to \_\_\_\_\_

Subject Type III Cement

Estimates on hand indicate 1985 sales of high early will be roughly as follows:

Durkee/Lime	2,000 Tons	
Seattle	19,000 "	14,850 per 11/09/84 forecast.
Lake Oswego	7,000 "	
Inkom	4,000 "	

In order to avoid making or storing Type III at Durkee during most of the coming year, we now expect to manage the supply of that product as shown herein.

DURKEE/LIME

During November and December, 1984, grind 9-10,000 tons. Concurrently, or as rapidly as possible, ship whatever Lake Oswego can store to Lake Oswego. Probably 40 carloads minimum.

Truck the balance to Lime for use in supplying local market and to replenish Lake Oswego on demand.

SEATTLE

Seattle will continue to grind Type III using Durkee clinker. I understand that one clinker shipment has been scheduled and future shipments can be timely made to keep Seattle supplied.

LAKE OSWEGO

Plan to accept Type III in November and December, 1984 to fill silos No. 17, 23, 24 and 25. As silos empty, some can be used for other types as may be required. Draw Type III from Lime in 1985 to maintain desired inventory.

INKOM

Plan to make only what is needed for the Inkom market. Would ship some to Boise terminal only if demand would exceed Durkee/Lime's ability to supply.

Regards,
